SUMMARY

Full Stack Developer specializing in the MERN stack, with hands-on experience designing, developing, and deploying end-to-end web applications. Combines expertise in creating responsive user interfaces and secure RESTful APIs with a unique background in machine learning research, evidenced by a publication with Springer.

WORK EXPERIENCE

Full Stack Developer

Mar 2025 – Present

Origa Networks Ernakulam, India

- Engineered the complete frontend UI for a multi-screen SaaS platform, implementing strategic caching and API fetch optimizations to reduce component load times by approximately 40% and significantly improve user interactivity.
- Led the end-to-end development of two fully functional client landing pages, delivering both projects from concept to deployment on Vercel within a one-month timeframe.
- Developed and integrated features for a tile management SaaS application using Next.js, PostgreSQL, and AWS, focusing on stock and delivery management for distributors.

MERN Stack Developer Intern

Jul 2024 – Jan 2025

Origa Networks Pvt. Ltd. Kochi, India

- Developed full-stack web applications using MongoDB, Express.js, React, and Node.js in real industry projects, ensuring enhanced database performance and API efficiency.
- Collaborated with cross-functional teams to implement RESTful APIs and optimize database performance.
- Secured Node.js backend against SQL injection and XSS attacks using Express Validator and Helmet.js, achieving zero critical vulnerabilities in penetration tests.

SKILLS

- **Languages:** Excellent in JavaScript(ES6+), TypeScript, HTML, SQL, CSS, Bash
- **Web Development:** React, Angular, Next.js, Node.js, Bootstrap, Tailwind CSS, Redux, React Query, RESTful APIs
- **Databases:** MongoDB, PostgreSQL, MySQL
- **Soft Skills:** User-Centered Design (UCD), Agile Development, Analytical Problem-Solving, Team Collaboration

PROJECTS

Pariyapuram Super League - Football Management App,

Description: Constructed and refined a scalable MERN-stack platform to manage football tournaments, integrating fixture scheduling, player bidding, live streaming, ticket sales, and real-time news updates—reducing administrative workload by 60%.

- Devised a robust, Stripe-integrated ticketing platform that achieved a 98% transaction success rate and enhanced API response times by 40%.
- Optimized MongoDB database queries and pagination, reducing load times by 30% for 1000+ daily active users
- **Technologies Used:** React.js, Node.js, Express.js, MongoDB, Mongoose, Stripe API, Clerk Auth, YouTube Live API, Redux, Tailwind CSS, RESTful APIs, Git.

Shop.Entetile - Tile Inventory Shop System ,

Description: Designed and developed a scalable backend system for a tile inventory management SaaS application, handling real-time stock, products, and warehouse operations.

- Designed and developed a scalable backend system for a tile inventory management SaaS application.
- Implemented PostgreSQL database schema for managing total stock, godown inventory, staff, leads, and customers.
- Built RESTful APIs with Node.js and Express.js to support CRUD operations, data validation, and business logic for inventory tracking and user management.
- **Technologies Used:** Node.js, Express.js, PostgreSQL, Zod, RESTful APIs, JWT Authentication

Camp Management System – Disaster Relief Donation Platform,

Description: A full-stack web application designed to manage disaster relief efforts for camps during the Wayanad landslide crisis. The system streamlines distribution of food, clothing, lighting, and donation tracking, enabling efficient coordination between volunteers, donors, and camp organizers.

- Built a responsive frontend using Handlebars (HBS), Bootstrap, and CSS/JavaScript for seamless user interaction across devices.

- Developed Node.js/Express.js backend with RESTful APIs to handle camp registrations, donations, and volunteer management.
- Implemented role-based access control (admin, volunteer, donor) to ensure security and accountability in camp operations.
- **Technologies Used:** Handlebars (HBS), Bootstrap, CSS, JavaScript, Node.js, Express.js, MongoDB

Ozmia Gold Diamonds ,

Description:Developed a responsive and high-performance e-commerce frontend for a jewelry brand using React and TypeScript.Optimized performance and SEO with code splitting, lazy loading, and Lighthouse audits.

- Implemented dynamic product catalog, filtering, sorting, and search functionalities with efficient state management using TanStack Query.
- Built reusable UI components and applied Tailwind CSS for consistent, mobile-first, and accessible design..
- Enhanced user experience through animations and micro-interactions with Framer Motion..
- **Technologies Used:** React, TypeScript, TanStack Query (React Query), Tailwind CSS, Vite, React Router, Axios, Framer Motion

TMDB Movie Search Web Application ,

Description:Built a responsive movie discovery web application using React and TMDB (The Movie Database) API, Implemented real-time search functionality with debounced input using a custom useDebounce hook to reduce unnecessary API calls.

- Built a responsive movie discovery web application using React and TMDB (The Movie Database) API.
- Utilized React Hooks for state management and API data handling to maintain clean, functional components.
- Designed a responsive and intuitive user interface with CSS for consistent cross-device usability.
- **Technologies Used:** React, JavaScript, Axios, useDebounce, React Hooks, CSS, TMDB API

E-Commerce Web Application – Full-Stack Development ,

Description:Developed a full-stack e-commerce web application to manage products, orders, users, and payments, Designed and implemented backend logic with Node.js and Express.js, enabling seamless CRUD.

- Developed a full-stack e-commerce web application to manage products, orders, users, and payments.
- Built a responsive and interactive frontend using Handlebars (HBS) templating engine, CSS, and JavaScript.
- Integrated MongoDB for scalable data storage and optimized queries for high performance.
- **Technologies Used:**Handlebars (HBS), CSS, JavaScript, Node.js, Express.js, MongoDB, RESTful APIs

EDUCATION

Bachelor of Computer Application
ISS ARTS AND SCIENCE COLLEGE

Jun 2022 - Mar 2025
CGPA: 6.67

CERTIFICATIONS

- **Certifications:** Certified MERN Stack Developer(Luminar TecnoLab), React Development Certification, Angular Development Certification, Meta Front-End Developer Professional Certificate (Coursera)

ADDITIONAL INFORMATION

- **Languages:** English (Fluent), Malayalam (Native), Hindi (Intermediate)
- **Volunteer Experience :** NSS ISS SB Volunteer & ISS Student Branch Member
